

Pengbiao (Jerry) Chen

Toronto, Canada | +1 438 941 9480 | Pengbiao.chen@mail.utoronto.ca | www.linkedin.com/in/pengbiao-c-1286a42b0

SKILLS

- **Programming Skills:** Proficient in Python (Pandas, NumPy, Scikit-learn), SQL (PostgreSQL, MySQL), and PySpark, with a proven track record of utilizing VBA and ETL pipelines for data extraction and automation.
- **Risk Management:** Expertise in IFRS 9 ECL Modeling (PD, LGD, EAD), RCSA, Stress Testing, and Basel III/IV; self-motivated CFA Level I Passed and FRM Part I candidate.
- **Data Visualization:** Skilled in developing dynamic dashboards and visualizations using Tableau, Power BI, and Matplotlib, alongside Advanced Excel (Power Query, Pivot Tables) to enhance data-driven decision-making.
- **Soft Skills:** Demonstrated ability in cross-functional communication, problem-solving, and analytical thinking, with experience delivering management-level presentations and managing complex stakeholder relationships.

EDUCATION

University of Toronto, School of Graduate Studies

Master of Mathematical Finance

Toronto, Canada

Aug 2025 - Jul 2026

Relevant Coursework: Data Science, Pricing Theory, Risk Management, Numerical Methods, Machine Learning for Finance

Columbia University, Graduate School of Arts and Sciences

Master of Arts in Economics

New York, United States

Sep 2023 - Dec 2024

Relevant Coursework: Advanced Financial Economics, Advanced Econometrics, Advanced Microeconomic Analysis, Advanced Macroeconomic Analysis

New York University, College of Arts and Sciences

Bachelor of Arts in Economics and Mathematics

New York, United States

Sep 2019 - May 2023

Awards: Dean's List in 2020, 2022, and 2023

PROFESSIONAL EXPERIENCE

Royal Bank of Canada

Operational Risk and Regulatory Compliance Management Co-op

Toronto, Canada

Jan 2026 - Apr 2026

- Supported Risk and Control Self-Assessment (RCSA) execution for Group Risk Management (GRM) business units, assisting in operational risk identification and control validation for MCCR and CRO US.
- Reviewed risk statements, categories, and key control indicators to improve documentation quality, helping risk owners rationalize the operational risk register and reduce duplication.
- Developed an automated tool using Excel VBA and Pivot Tables to streamline the creation of risk profiles for each group, effectively reducing manual reporting time and improving data consistency.
- Analyzed operational data to provide year-over-year (YoY) comparative insights; identified key risk drivers and presented findings to management to explain shifts in risk-rating distributions.

Deloitte

Banking Technology Consulting Intern

Shanghai, China

Apr 2025 - Aug 2025

- Analyzed Industrial Bank's credit card data—including transaction behavior, product usage, and application flow—using SQL and Excel to uncover drivers of low card usage and customer inactivity.
- Mapped out business workflows and compared peer-bank practices to identify pain points in product design and data definitions, delivering a practical business requirement matrix for future system updates.

Bank of China

Risk Analyst Intern

Jiangsu, China

Jul 2022 - Aug 2022

- Researched climate-related physical and transition risks alongside regulatory frameworks, supporting the commercial real estate credit risk modeling team by assessing how these emerging factors impact PD and LGD.
- Assisted senior team members in model refinement, evaluating risk drivers, and testing variable selection while addressing potential issues of multicollinearity, overfitting, and statistical robustness.
- Conducted economic and statistical reviews to determine whether climate-sensitive indicators provided meaningful explanatory power beyond existing variables (e.g., location, property type) or simply added noise.

Bank of Jiangsu

Credit Risk Analyst Intern

Jiangsu, China

Jul 2021 - Aug 2021

- Developed a Python-based ETL pipeline (using Pandas) to automate the extraction, cleaning, and standardization of mortgage portfolio data from disparate systems, including origination records, payment flows, and credit profiles.
- Resolved common data quality issues such as missing values, inconsistent formats, and outliers, ensuring accurate calculation of core EAD and LGD inputs like current LTV and outstanding balances.
- Supported the credit risk team by transforming raw data into structured datasets and utilizing Excel pivot tables to generate dynamic, weekly credit risk reports for portfolio monitoring.
